

Our line is personalized through dye sublimation, a process that produces bright, vivid colors and fine detail, while leaving fabrics and surfaces soft to the touch. Color impregnates the materials permanently and items are fully washable. If you can print it on an inkjet printer, we can imprint it on any of these products or custom-cut items to your specification. Because the color is applied in transfer, all base products are white only. *Retail prices are in parentheses and include imprinting per item. Customary wholesale terms apply from 30 to 50 percent discount, depending on quantity.*
